The consequences of infidelity unfold gradually, challenging the notion that it has no impact in this fictional tale. Unlike romantic movies or real-life examples where affairs seem inconsequential, the protagonists in this story face delayed but evident repercussions. Ultimately, the one who endures deception and abandonment emerges with patience, receiving positive outcomes and admiration from those around them.

This book narrates the 1965 revelation of “memory molecules,” their initial credibility crisis, and the subsequent triumphant discovery of neuroactive peptides, including endorphins. The tale unfolds through biographical snapshots and Louis Neal Irwin’s personal experiences across West Texas, Kansas, Houston, New York, Detroit, and Boston. This pivotal chapter in neuroscience’s early history seamlessly captivates lay readers, revealing the clash between personalities, conventional wisdom, and unorthodox explanations.
